INTRODUCTION

This is the first effort on behalf of SAANZ to compile and publish information of a professional nature about its members. The intent is to provide a service that will make it possible for the members to become better acquainted with one another, to know more about their scope, interests, and qualifications, to assist them in making contacts that will better coordinate activities and developments in special interest areas, and to improve employment opportunities. It is hoped that this service will prove of sufficient value to members to warrant annual up-dating and publication of the Directory.

In gathering this information each member was asked to complete a census form. The form was designed, however, as something of a shot-in-the-dark, trying to identify information that would be generally useful. As you use this Directory, if you have any suggestions as to how it could be improved, either by deleting or adding information or by alterations in presentation, please let me know — your suggestions as to the worth of this service and how to improve it will be most welcome.

Effort was made to follow the information submitted by the members as nearly as possible with a minimum of editing. This necessitated resisting the temptation to standardize and codify some of the material, especially the areas of special interest. Given the nature of sociology and variable definitions and shadings of specializations, it was decided to print the areas of interest as submitted but to place them so as to make them easily identifiable.

The individual entries are presented in alphabetical order according to the following basic format (but not every entry contains information in each category, depending upon what was submitted by the individual):

Name	Year of Birth	Areas of Special Interest
Mailing Address		
Present Position		
	—Student Status (Where applicable)	
Nature of Professional Activity		
Education		
Previous Positions		

I trust you will find this
Directory useful.
